WWIF SCHOLARSHIP DESCRIPTIONS

Foundation Fund Scholarship

The Foundation Fund was established in June 2013 as an endowed fund by the WWIF Board of Directors. With confirmation from respective families, the Charles Lill, Michael Manz, Glenn Coogan, and John Farmer funds plus the Industry Need and Rainy Day Funds were used to create the initial endowment. Number of awards is determined annually. These scholarships may be made in amounts up to \$5,000.

George & Susan Carter Scholarship

The George & Susan Carter Scholarship was established in 2017 as an endowed fund in honor of WSU researcher and winemaker George Carter and his wife, Susan. George Carter worked side by side with Dr. Walter Clore and the two were close friends. As part of his day-to-day activities, Carter developed a system for classifying American, European and hybrid grape varieties. In recognition of his wine making accomplishments, Carter was elevated to a Supreme Knight in the International Brotherhood of the Knights of the Vine. This scholarship was established to assist students of limited means to attain associates, bachelors and graduate level degrees in viticulture and enology and will offer one (1) \$1,000 auto-renewing scholarship per year.

Horse Heaven Hills Wine Growers Scholarship

The Horse Heaven Hills Wine Growers offers two (2) \$2,000 scholarships for students who are residents of Benton, Klickitat or Yakima counties and interested in the study of viticulture and/or enology. Preference will be given to students with a parent employed in the Washington wine industry as demonstrated by a letter from parent's employer. The scholarship was established by members of the HHHWG group who are dedicated to promoting education of the grape growing and wine producing industry in Washington.

Walter J. Clore Scholarship

The Walter J. Clore Scholarship was established in 1997 by the Washington Winegrowers Association in honor of Dr. Clore's grape research and lifetime achievements in the field of viticulture and enology. Working with growers, Dr. Clore and his colleagues published information on grape varieties, diseases, insects, mineral nutrition, irrigation, cover crops, weed control and climatological effects, including winter injury. He tested various trellis designs, which eventually led to the widespread adoption of mechanical harvesting. More than any other individual, Dr. Clore has had a profound and lasting impact on the Washington wine industry. The number of awards is determined annually and scholarships range from \$500-\$2000.
